CERTIFICATE

Your company supports the energy production from renewable sources.

Suomi Building Finland REC Oy

has chosen electricity with Guarantees of Origin.

Fortum guarantees that the equivalent amount of electricity that its customer company has used in the period **1.1.2025** to **31.12.2025**, **1 331 MWh,** is produced from renewable sources. The guarantees are certified in accordance with the EU Guarantee of Origin scheme.

Guarantees of Origin are the EU's documentation standard for tracing the origin of produced energy and can be used for sustainability reporting, reducing your company's Scope 2 emissions from purchased electricity. The system was established to stimulate increased investment in and development of energy production from renewable energy sources, with the intention of accelerating the transition from fossil to renewable energy.

Thank you for supporting the energy production from renewable sources.
